

TOILET ROLL TUBE RACE CAR!

Here's how to make an awesome race car with just a toilet roll tube, some cardboard, paper fasteners and paint!

1. Paint the toilet paper tube and leave to dry
2. Draw circles on cardboard - car wheels x4, steering wheel x1
3. Cut out the shapes and paint (you can create car decorations at this stage!)
4. Once everything is dry you can cut openings - fold back and hold with glue to make a seat (you may need to assist younger children with this)
5. Fasten the wheels
6. Now the most fun part - decorate the car with your decorations and glue in the steering wheel!
